

Basel Al-Raoush

Software Engineer | Java, React, Python

alraoushb@gmail.com | +36 70 349 9665 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | Budapest, Hungary | Open to relocate

EXPERIENCE

Student Software Engineer

Mar 2025 – Dec 2025

ABBYY — Budapest, Hungary

- Worked on the ABBYY FlexiCapture enterprise document capture and processing platform.
- Debugged encoding and parsing issues in the OCR pipeline, including a client-reported bug traced to an encoding mismatch.
- Navigated a large, mature codebase through code reviews and cross-team collaboration.

Software Engineer Intern

Jan 2025 – Feb 2025

Bank of Jordan (Mihnati Program) — Amman, Jordan

- Wrote and tested Java/Spring features that went into production.
- Fixed bugs across **2 microservices** and wrote JUnit tests to maintain team coverage standards.

Freelance Mobile Developer

Barber Booking App — Remote

- Built a Flutter + Firebase app with role-based access for **3 user types**.
- Set up Riverpod for state and Firebase Cloud Messaging for push notifications.
- Shipped a beta with **10+ features** including live sync, auth, and booking management.

Software Engineer Intern

Aug 2024 – Sep 2024

Inspire for Solutions Development — Amman, Jordan

- Built React.js UI components following the bank's design guidelines.
- Wrote Python scripts to automate repetitive data processing tasks for the team.
- Helped configure GitHub Actions + Jenkins CI/CD pipelines for smoother deployments.

EDUCATION

BSc in Computer Engineering

Expected Jul 2026

Budapest University of Technology and Economics (BME) — Budapest, Hungary

- Stipendium Hungaricum scholarship recipient.

SKILLS

Programming: Java, Python, JavaScript, TypeScript, Kotlin, SQL, Bash

Frameworks: Spring Boot, React.js, Node.js, Flask, Flutter, REST APIs, Streamlit

AI/ML: Scikit-learn, Hugging Face, NLP, Computer Vision, RAG

DevOps & Tools: Docker, Git, GitHub Actions, Jenkins, Linux, Postman, Selenium

Databases: PostgreSQL, MongoDB, Firebase, MySQL, Oracle

PROJECTS

SentimentTrader [React](#), [Spring Boot](#), [Python](#), [FinBERT](#), [PostgreSQL](#), [Docker](#) | [GitHub](#)

AI-powered paper trading platform with **\$100K** virtual balance and live market data via Finnhub WebSocket. FinBERT analyzes financial news sentiment (bullish/bearish). Includes pessimistic locking, idempotency keys, circuit breakers, and JWT auth with refresh tokens.

Property Management System [React](#), [Node.js](#), [MongoDB](#), [Redux](#) | [Live Demo](#)

Full-stack app with tenant portals, lease tracking, and payments. Used Redux for real-time data updates across admin dashboards.

Online Signature Verification [Python](#), [SVM](#), [XGBoost](#), [MLP](#) | [GitHub](#)

Built pipelines to process coordinate and pressure data from handwriting samples. Trained multiple ML models, reaching **>90%** accuracy.

OpenMetroMaps Extension [Java](#)

Extended an open-source transit map application with CRUD operations for network editing. Refactored navigation logic to improve stability.

CERTIFICATIONS

GitHub Foundations Certification — GitHub (2025)

ChatGPT Prompt Engineering for Developers — DeepLearning.AI & OpenAI (2025)

Cisco Cybersecurity Essentials — Cisco (2022–2023)

VOLUNTEERING

IT Team Member [TEDxBME](#)

2023 – 2024

Set up and maintained the official event website using WordPress.

Tech Team Member [GDSC \(BME\)](#)

2023 – 2024

Built a Discord bot and a web analytics tool using TypeScript and Cloudflare Workers.

LANGUAGES

English (Fluent)

German (A1 – Learning)

Hungarian (Basic)

Arabic (Native)
